➤ My Profil

Hello! Resilient and organized, I strive to develop games that make the team proud and satisfy players.
Very curious, I am always seeking new technical challenges and learning from each other.
I will be available to start in **August 2026!**

➤ Experiences

Gameplay Programmer, Present

OSome Studio, Internship & Junior FTC

I am working on Garfield Escape from Monday, an upcoming Unreal Engine 3D platformer for consoles and PC.

- Handle my workload to meet deadlines.
- Implement the game's UI.
- Maintain existing gameplay systems.

Associate Client Developer, 2024

Ankama, Dofus Unity, Internship

In the client team, I developed in 3 months, features and fixed bugs in the release of the Dofus Unity's beta.

- Use pipeline of a live game.
- Work on UIs and combat system.
- Communicate in a 70-person project.

Game Programmer & Designer, 2022

Boby, a Cegid Company, Internship

In this start-up creating an ERP, I developed in 2 months, a web-game integrated to the software.

- Teamwork in Scrum and Agile.
- Develop a game for various devices.
- Design a modular codebase.

➤ Student Projects

RSM, 2024-2025 – UE & C++

Social-Horror Game, 8 people, 10 months

With 3 other players, cooperate, betray and survive to regain your freedom!

- Organize and coordinate a team.
- Work on the game's concept/intentions.
- Program networked features.
